

# BULK TRANSFER

Every stage of evolution of our systems are fully industry driven, with a large emphasis on quality control.

TECALEMIT offers custom-built systems to move just about any fluid needed. Our DEF PRO-5000 transfer pump dolly systems are designed based on your individual needs so you don't end up with wasted space on the unit, in your warehouse, on your truck, or in the field.

Our DEF PRO-6000 transfer pump skid systems are designed for bulk to tote, rail to bulk, or bulk dispensing. It's the ultimate skid workhorse that is unique to your specific wants and needs.

TECALEMIT also offers Truck (Belly) Boxes that offer space efficiency, flexibility, and mobility at the highest level. Each of these units are customizable and offer premium features.
