

# INVENTORY MANAGEMENT

HDM  
**SKYDRIVE**   
ANYTIME. ANYWHERE. ANY DEVICE.

TECALEMIT offers variety when it comes to our inventory management systems. From stand alone units, to complete dispensing packages, to dual-hose or weights and measures component applications, our portfolio has it all.

The popular Wonderbox and Superbox units offer 1-hose, 2-hose, and 5-hose options, while our line of HDM eco dispensers offer built-in inventory management systems to plug and play ready packages. In addition, we offer two pro systems, the M1 and WM Pro dispensers.

To take our existing fuel management systems to the next level, we're introducing the HDM SKYDRIVE™. Easily manage and monitor inventory and assets across multiple locations via the HDM SKYDRIVE™. Gain data accessibility via any device, anytime, anywhere.
