OIL MANAGEMENT SYSTEM

Made-to-order solutions | Precise | Professional | Reliable

With the TMS air, TECALEMIT now offers what is a familiar and practical solution, but with the added advantage of being able to connect to the oil management system via WiFi.

Using any tablet or PC, you can access the server software on the central workstation. Thanks to TECALEMIT's modular system, existing systems can also be retrofitted or completely reconfigured without requiring new devices to be used in all areas.

View data and information directly at the vehicle, in the workshop, and at other locations simultaneously. In an increasingly digitized world, TECALEMIT offers the TMS air as an easy, effective, and quick solution.

Description: 030471300 TMS air

- Manage oil supply system via LAN/Wi-Fi connection
- Can be used with any commercial tablet or PC
- Optimized processes increase revenue and productivity
- Access reports and logs to track and monitor
