TECALEMIT offers custom built transfer pump dollies to get you where you need to go. These systems can be built to transfer various fluids, whether in service centers, auto dealerships, or wherever you may need them.

Each of these systems are designed based on your specific needs. We can include tires that easily glide on concrete floors, or more robust ones that can power through the industrial field. We can also include up to 25 ft. of hose, ticket printers, as well as explosion-proof components. Truly customized systems that are built for YOU.

So by all means, think of what limits you need to push. Let us know, and allow us to help you create a custom solution masterpiece to defeat your challenges. We'll gladly accept the challenge!
