WET HOISING SYSTEMS

PORTABLE PACKAGES

Space efficiency | Mobility | Value-driven | Industrial | Quality

Here at TECALEMIT, we enjoy pushing the envelope. With our wet hosing portable packages, we do just that. Our wet hosing systems are the perfect solution for mobile fueling and on-site refueling, where a delivery truck directly refills company vehicles and equipment on location.

TECALEMIT's wet hosing portable packages are space efficient, work off DC power, have hose reels, and carry a small DEF tank all within a specific footprint. With a variety of available features and upgrade options, our wet hosing systems are a perfect example of how far we are willing to go to bring to life an idea or customer concept to help them gain new business, or open up new opportunities.

No one else does end user equipment and custom transfer systems under one roof quite like we do. Let us help you push the limits, we gladly accept the challenge to build you your masterpiece!
