

PRO-6000 SERIES

HI-FLOW TRANSFER PUMP SKID SYSTEMS

VALUE-DRIVEN WITH AN EMPHASIS ON QUALITY

TECALEMIT's Pro-6000 Series expands beyond just DEF. In fact, we design and build high flow transfer skid systems for just about any fluid. The Pro-6000 Series embraces the hi-flow bulk transfer for fuels, lubes/oil, Diesel Exhaust Fluid (DEF), as well as specialty chemicals.

Much like all TECALEMIT equipment, these systems are designed with a value-driven approach, with an emphasis on quality. The Pro-6000 Series of hi-flow transfer skid systems offer solutions to provide quick turnaround times. From an engineering and design perspective, these systems are unique and centered on individual customer needs.

With the Pro-6000 Series, you're options are endless. Each unit is built on a heavy duty powder coated steel skid, providing you the ease of use and mobility to move the unit around work areas. They can be designed for various applications, fluids, and purposes to meet your exact needs.

Whatever your flow may be, let us know. Let us see how we can help you design a tailor-made solution to meet whatever challenges are in your way.
